

## Partner: Saville Assessment - Wave Integrate (Assessment)

Smarter hiring, embedded in Teamtailor faster than ever

Our tools are built on the industry's strongest predictive power for performance and potential, helping teams predict success and surface risk earlier. You get clear, role-relevant insights that make talent decisions consistent, fair, reduce bias, and create an audit-ready trail when decisions face scrutiny.

In this article

- You will learn how to enable the Wave Integrate solution on Teamtailor

### Enable the integration

#### *Before You Begin*

Please review the following requirements to ensure the integration works correctly:

- You must be an **admin** of your Teamtailor account, or have access shared by an admin.

To enable the integration, please follow these steps:

1. [Link your Teamtailor account](#)
2. You will receive a **connection flow link** from us.
3. In this link, you will:
  - **Grant access** to job posts and candidate data
  - **Provide your Teamtailor credentials**

Once you have activated Saville's integration with Teamtailor you are ready to start inviting applicants to complete assessments through Teamtailor. Read below to learn how this is done.

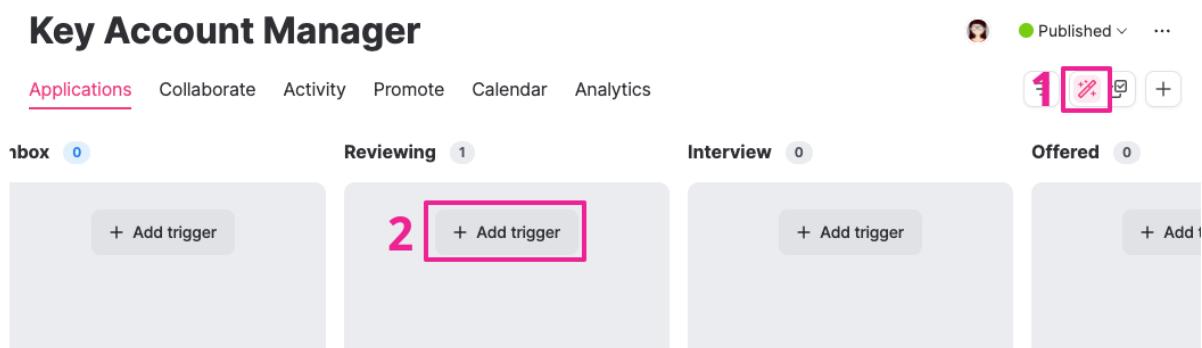

### Set up workflow in Teamtailor

To use Wave Integrate, the first step is to add a trigger to your recruitment process in Teamtailor. This means the assessment package is automatically sent to the candidate the first time the candidate is moved into this stage.

## Configure Triggers on Job positions on Teamtailor

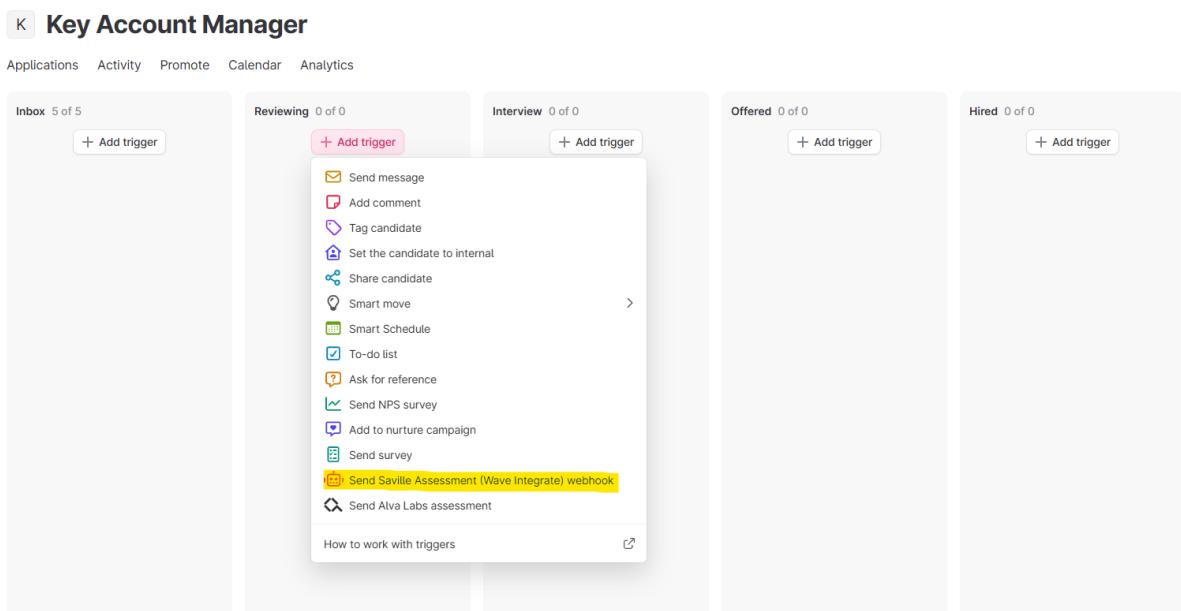

Head over to one of your jobs on Teamtailor. From the applications view, you should select the **wand icon (1)**.

Select the stage that you want users to receive the assessments and add the trigger by selecting '**+ Add trigger** (2)'. Candidates that are moved into this stage will get the invite for the assessments.

The screenshot shows the 'Key Account Manager' job application page. At the top, there are tabs for Applications (which is underlined in pink), Collaborate, Activity, Promote, Calendar, and Analytics. Below the tabs, there are five stages: 'Inbox' (0), 'Reviewing' (1), 'Interview' (0), 'Offered' (0), and 'Hired' (0). Each stage has a '+ Add trigger' button. The 'Reviewing' stage is highlighted with a pink box around its name and a pink border around its '+ Add trigger' button, which has the number '2' on it, indicating it is the second step in the process.

Now, select '**Send Saville Assessment (Wave Integrate) webhook**

The screenshot shows the 'Reviewing' stage trigger configuration. A pink box highlights the 'Send Saville Assessment (Wave Integrate) webhook' option in the list of available triggers. The list also includes other triggers like 'Send message', 'Add comment', 'Tag candidate', 'Set the candidate to internal', 'Share candidate', 'Smart move', 'Smart Schedule', 'To-do list', 'Ask for reference', 'Send NPS survey', 'Add to nurture campaign', 'Send survey', and 'Send Alva Labs assessment'. At the bottom of the list, there is a link 'How to work with triggers'.

Select the appropriate package for your candidates that you would like to use for this position

When you're done with the test trigger setup, select **Add Trigger** in the bottom right.

**Send webhook**

Every time you move a candidate to the *Reviewing* stage, send the candidate to Saville Assessment (Wave Integrate).

Add trigger

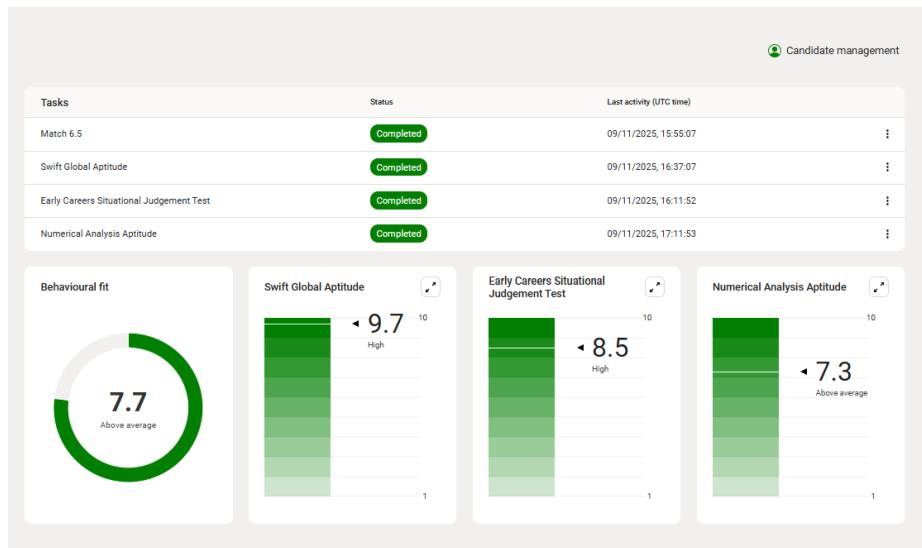

Every time a candidate reaches the selected stage, the assessments will be created in Oasys and an email invitation will be sent to the candidate. Once all the tests have been completed Oasys will send the results back to Teamtailor.

## Review candidate's result

After the candidate has completed their assessments, you can find the results on the candidate card in Teamtailor.

To access the Wave Integrate dashboard select '**See results**'
